Statement of Outdoor Play

Whenever possible/practical the children will be encouraged to be taken outdoors to play. During these times safety is of utmost importance. Before the children are taken outside:

- A member of staff must check the area for any potential dangers or hazards
- Make sure the area is safe and that security is adequate
- Ensure that all gates are shut and nobody else is present on the site
- Ensure that all children are wearing appropriate clothing for the weather conditions

In hot weather children will have access to drinks. Any equipment provided for outdoor play must be stimulating and appropriate to the children's age ranges and development level. Staff to child's ratios must be followed at all times. If there are any problems all children will be brought back inside immediately.
